- Cushion Vinyl on PVC carrier
- total construction thickness: 6 mm
- Usability class 31/AC3
- Bordering bevelled edge

1212 x 158 mm

## The waterproof floor

Aqua comfort belongs to the collection of waterproof design floorings. The vinyl surface attached to a PVC core makes the flooring 100% water resistant - therefore preventing swelling of the panels.

The particular strength of the panels also makes this flooring suitable for heavy-duty use. The combination of an aesthetic surface, loadability and water resistance make aqua comfort the ideal flooring for direct wet rooms as well as rooms which typically come into contact with moisture due to their orientation.

The all-round varnished bevel produces a particularly attractive laying pattern.

Royal Oak  
Art.-Nr. 32318

Stone Oak  
Art.-Nr. 32322

Summer Oak  
Art.-Nr. 32320

The convenience begins with the installation: CLASSEN megaloc with Isowaxx makes installing the laminate panels child's play, almost without the use of tools.

...very simple installation

Position ...

Simply place the long profile of the new panel in the previously installed row and lower to connect to the new row.

click ...

A short push with the thumbs on the short profile and the panel locks into place with an audible click.

finished!
